

ASSEMBLY INSTRUCTIONS

ARGo43 – MODERN CIVILIANS SET

These miniatures are supplied in two forms. These can be assembled into three different forms, and full instructions are given below.

Print out as many pages as you need of your preferred type, cut, glue and use.

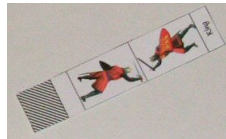

Credits:

Produced by Graham Bottley

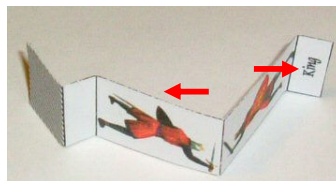

Created using the Poser 6 program from Curious Labs.
Models and Textures used are available from DAZ3D (www.daz3d.com), Content Paradise and Renderosity

Flat Miniatures

- 1 Cut out the flat miniatures, including the hatched base panels:

- 2 Gently score along the short horizontal lines with a blunt blade.
- 3 Fold the miniature along the score lines so that it looks like this:

- 4 Apply paper glue to the insides of the figure panels.
- 5 Press glued panel together and ensure they stick. Use a paper clip or hold for a minute if necessary.

- 6 Apply glue to the reverse of the hatched panel. Press panel against base of miniature.
- 7 Use a paper clip to keep the miniature closed until the glue is dry.

ASSEMBLY INSTRUCTIONS

Triagonal Miniatures

- 1 Cut the triagonal miniatures out so that the blank panels are to the right of the three filled panels.

- 2 Using a blunt blade, gently score along all of the upright lines.
- 3 Fold along all of the score marks so that the miniature looks like this:

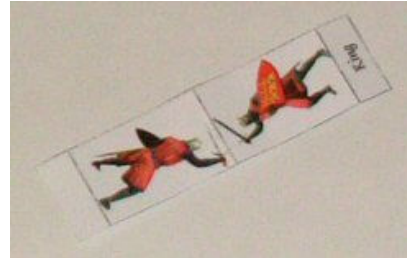

- 4 Apply paper glue to the outside of the blank panel. Press to the inside of the first filled panel.
- 5 Use a paper clip to keep the miniature closed until the glue is dry.

A-Frame Miniatures

- 1 Cut out the flat miniatures, cutting off the hatched base panels:

- 2 Gently score along the short horizontal lines with a blunt blade.
- 3 Fold the miniature along the score lines so that it looks like this:

- 4 Apply paper glue to the blank base flap.
- 5 Press glued panel to the back of the name panel.
- 6 Use a paper clip to keep the miniature closed until the glue is dry.

CUSTOM PAGE INSTRUCTIONS

It is often useful to assemble a custom sheet of miniatures for a particular game. This allows a whole platoon of guards, or a whole tribe of enemies, without printing all of the extra miniatures on the sheet. It is actually very easy to assemble custom sheets, and takes a few minutes per miniature. Acrobat Reader and a program such as Microsoft Powerpoint are all that is required, although it may be useful to have a graphics program to improve the quality of the custom sheet.

1) Open the appropriate file in Acrobat Reader and enlarge to at least 200%. Adjust the screen so that the whole of the miniature of interest is visible on the screen.

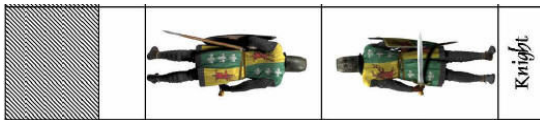

2) Click on the "Graphics Select Tool" button shown below.

3) Draw a box around the desired miniature, getting as close to the outer lines as possible.

4) Right-click and select "copy".

5) Paste the miniature into a blank Powerpoint (or similar) document sized to A4. It should look something like this:

6) Right-click on the image and select "Format Picture".

7) Choose the "size" tab and set the longest dimension (width in the above case) of the miniature as given below:

Normal Flat / A-Frame	9.2 cm
Large Flat Flat / A-Frame	12 cm
Normal Triagonal	8 cm
Car / Van Triagonal	23 cm
Motorbike Triagonal	12.6 cm

It is important that the "Lock Aspect Ratio" option is ticked.

8) If multiple copies of this miniature are needed, just copy and paste as appropriate. Arrange all miniatures next to each other.

9) Print and/or save page with appropriate title. Libraries can thus be built up of individual miniatures for custom printing.

It may be desirable to "clean up" the edges of the miniatures once they have been copied out of acrobat reader, to remove the edges of adjoining miniatures. The easiest way to do this is to paste the image into a graphics program such as Paint Shop Pro, zoom in and select the very edges of the miniature. Then go to the "Image" menu and select "Crop to Selection". The miniature can then be pasted into Powerpoint.

Type	Long Dimension
